

Nicholas Howell

Senior Full Stack Engineer

1194 88th Ave North
Saint Petersburg, FL 33702
(813) 817-4015
NICKHOWELL6425@GMAIL.COM

Summary

Versatile and impact-driven senior engineer with deep experience leading frontend and full-stack development across startups and enterprise environments. Proven track record of taking products from zero to scale, partnering with founding teams to launch apps that have reached multi million dollar evaluations. Expert in modern frontend ecosystems and equally comfortable architecting backend systems or leading data and analytics initiatives. Strong consulting background with a focus on clean UX, scalable infrastructure, and team leadership. Lifelong learner who thrives on exploring new technologies, frameworks, and building what's next.

Skills

- **AI & Automation:** OpenAI, LangChain, LLMs, Prompt Engineering, Vector Databases, Embeddings, API Integration, Chatbots
 - **Frontend:** JavaScript, TypeScript, React, Next.js, Remix, React Native, Vite, Preact, Svelte, Expo
 - **Backend:** JavaScript, TypeScript, Python, Node.js, Express, FastAPI, GraphQL, REST APIs
 - **DevOps & Infrastructure:** Docker, Kubernetes, Google Cloud Platform, AWS, Firebase, Supabase, DigitalOcean, CI/CD Pipelines, Cloud Functions
 - **Databases:** PostgreSQL, MySQL, MongoDB, Redis, BigQuery, Redshift, and more
 - **Testing & Automation:** Jest, Mocha, Playwright, Selenium, Expo E2E, Unit & Integration Testing
 - **Leadership & Strategy:** Technical Architecture, Team Building, Startup Consulting, Product-Market Fit, Roadmapping
-

Key Accomplishments

- **Multi-Million Dollar Acquisitions:** Played a key role in scaling and developing applications that led multiple startups to multimillion-dollar acquisitions.

- **Production-Ready Applications:** Single-handedly designed, built, and launched two major production applications from the ground up—delivering scalable, AI-integrated solutions used in real-world environments.
 - **Leadership & Mentorship:** Led and mentored small development teams, promoting best practices, code reviews, and continuous learning.
 - **Innovator in Cutting-Edge Technologies:** Pioneered modern frontend and backend frameworks, cloud infrastructure, and AI integrations, delivering exceptional client results.
-

Experience

JAN 2024 - CURRENT

AccountTouch, LLC – *CTO, Founding Engineer*

- Solely architected and built the entire platform—a cross-platform React Native (Expo, TS) mobile app, Node/Serverless backend, and Next.js + Tailwind web portal, all fully Dockerized and production deployed.
- Designed and managed scalable GCP/Firebase infrastructure (Auth, Firestore, Cloud Functions, Storage), including localized deployments optimized for field reliability and low-connectivity environments.
- Integrated complete Stripe payment flows for subscriptions, invoicing, and secure customer billing across mobile and web.
- Owned all DevOps, CI/CD, and release operations, handling Google/App store distribution, environment management, and automated delivery pipelines.
- Acted as CTO and day-to-day technical lead, driving product roadmap, architecture decisions, and rapid feature delivery across the entire stack.

OCT 2024 - JUN 2025

Good Code – *Senior UI Engineer*

- Embedded into diverse client teams to build and improve React-based applications, leveraging frameworks like Next.js, Remix, and Vite.
- Delivered high-quality, production-ready UIs with a strong focus on clean UX, performance, and maintainable code.
- Adapted quickly to new codebases, contributing to greenfield builds, legacy refactors, and critical feature delivery across multiple industries.

JAN 2019 - PRESENT

Pinnacle Design Lab & Full Stack Technologies – *Founder / Lead Full Stack Developer*

- Delivered tailored solutions for various clients, ranging from startups to established companies, specializing in R&D, feature development, and troubleshooting.
- Led end-to-end product development, from architecture and design to deployment, ensuring scalability and performance optimization.

- Managed development teams, facilitated code reviews, and maintained high-quality standards with testing and CI/CD pipelines.

JUNE 2016 - JUNE 2020

Lilypad / FinTech – *Developer*

- Played a key role in scaling the company from 3 employees to 20+, leading to its acquisition by a FinTech company in a multi-million dollar deal..
 - Collaborated closely with cross-functional teams (design, product) to deliver features that improved the platform's user experience and retention.
 - Led the development of a reusable component library and optimized the frontend architecture for performance and maintainability.
-

Education

Saint Petersburg College – *Bachelor's Degree in Computer Science (Equivalent)*

Relevant coursework: Software Engineering, Distributed Systems, Machine Learning, Data Structures & Algorithms, Database Management

Projects

- **PubSuite:** Architected and developed a full-stack platform using Next.js and FastAPI, with AI integrations powered by OpenAI for automated content and lead generation. Implemented RabbitMQ for real-time messaging and deployed the platform to Kubernetes for scalable, production-ready infrastructure.
 - **AccountTouch:** Built a cross-platform mobile CRM app using React Native, with Firebase Authentication, Realtime Database, Cloud Storage, and Google Cloud Functions for seamless real-time account management. Handled App Store deployment, ensuring a stable, production-ready experience for field sales users.

Personal Interests

Outside of software development, I enjoy spending time with my wife and family—including our two cats—playing ice hockey, traveling when I can, and exploring new video games. And like any true developer... I also enjoy software development in my free time.
